MASKS

N95-MASKS

Alpha Pro Tech
N-95 Particulate Respirator
PFL® (Positive Facial Lock®) Design
with Magic Arch® and Twist Seal®

Donning Instructions

Step 1.
Grasp suspension at top of mask with one hand. Make finger of other hand behind strap piece.

Step 2.
Open mask by pulling cover out and set strap pieces with mask as they open. It is NIOSH APPROVED that mask is fully open.

Step 3.
Place strap in pocket created. Stretch fabric over back of head, positioning behind head behind neck behind ears and top band near crown of head.

Step 4.
Carefully reposition to ensure seal conforms properly to the Magic Arch™. Fully inhale every time to ensure seal.

Step 5.
Holding mask at crown, pinch strap over bridge of nose. The mask on the adjustable strap on the side, pull down gently so that mask is snug against face.

Step 6.
Pinch any excess material together under chin and fold over or tuck.

Step 7.
Face Fit Check. To check fit, place both fingers along the edges of the respirator and inhale. Your respirator should cover most of the nose, mouth and chin. If the respirator leaks, adjust or replace the strap pieces. Repeat Steps 3 and 6.

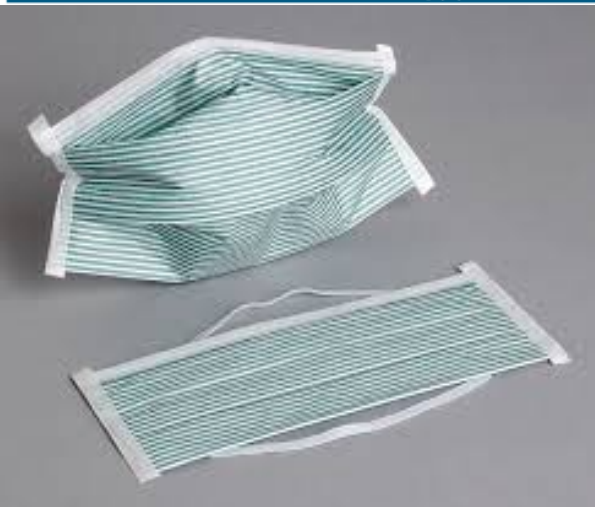

Step 8.
PFL Mask correctly fit to face.

WARNING: This respirator is not to be used for protection against chemical hazards. It is not to be used for protection against biological hazards. It is not to be used for protection against ionizing radiation. It is not to be used for protection against laser radiation. It is not to be used for protection against electromagnetic interference. It is not to be used for protection against fire. It is not to be used for protection against explosion. It is not to be used for protection against electrical shock. It is not to be used for protection against lightning. It is not to be used for protection against high voltage. It is not to be used for protection against low voltage. It is not to be used for protection against static electricity. It is not to be used for protection against magnetic fields. It is not to be used for protection against radio frequency fields. It is not to be used for protection against microwave radiation. It is not to be used for protection against ultraviolet radiation. It is not to be used for protection against infrared radiation. It is not to be used for protection against visible light. It is not to be used for protection against sound. It is not to be used for protection against vibration. It is not to be used for protection against shock. It is not to be used for protection against impact. It is not to be used for protection against falling objects. It is not to be used for protection against fire. It is not to be used for protection against explosion. It is not to be used for protection against electrical shock. It is not to be used for protection against lightning. It is not to be used for protection against high voltage. It is not to be used for protection against low voltage.
